EXTINGUISHING MEDIA	Water fog, carbon dioxide, foam, dry chemical
SPECIAL FIRE FIGHTING PROCEDURES	Highly flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Highly flammable liquid and vapor. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Organic dust in the presence of an ignition source can be explosive in high concentrations. Good housekeeping practices arerequired to minimize this potential.
PROTECTIVE MEASURES IN FIRE	Full protective clothing and approved self-contained breathing apparatus required for fire fighting person.
