Do not get in eyes, on skin, on clothing. Do not take internally. Use with adequate ventilation. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. After contact with skin, wash immediately with plenty of water.

Wear suitable protective clothing. May evolve oxides of sulfur (SO<sub>x</sub>) under fire conditions.

PRIMARY ROUTES OF EXPOSURE Skin, Eye, Inhalation

HUMAN HEALTH HAZARDS -

ACUTE

EYE CONTACT	Can cause mild irritation.
SKIN CONTACT	Can cause mild irritation.
INGESTION :	Not a likely route of exposure. May cause asthmatic-like attack.
INHALATION :	Irritant to respiratory system. Causes asthmatic signs and symptoms in hyper-reactive individuals.
SYMPTOMS OF EXPOSURE :	

Acute : A review of available data does not identify any symptoms from exposure not previously mentioned.

Chronic : A review of available data does not identify any symptoms from exposure not previously mentioned.

AGGRAVATION OF EXISTING CONDITIONS : A review of available data does not identify any worsening of existing conditions.

CONDITIONS :

HUMAN HEALTH HAZARDS -

CHRONIC :

Ingestion of sulfite can cause a severe allergic reaction in asthmatics and some sulfite sensitive individuals. The symptoms can include difficulty in breathing, flushed skin and a rash. Chronic exposure to sulfites may cause symptoms of upper respiratory disease and affect sense of taste and smell.

## 4. First Aid Measures

Do not touch spilled material. Stop or reduce any leaks if it is safe to do so. Wear personal protective equipment recommended in Section 8 (Exposure Controls/Personal Protection). Notify appropriate government, occupational health and safety and environmental authorities.
METHODS FOR CLEANING UP :	
SMALL SPILLS:	Soak up spill with absorbent material. Place residues in a suitable, covered, properly labeled container. Wash affected area with water.
LARGE SPILLS:	Contain liquid using absorbent material, by digging trenches or by diking. Reclaim into recovery drums or tank truck for proper disposal. Wash site of spillage thoroughly with water. The environmental fate was estimated using a level III fugacity model embedded in the EPI (estimation program interface) Suite TM , provided by the US EPA. The model assumes a steady state condition between the total input and output. The level III model does not require equilibrium between the defined media. The information provided is intended to give the user a general estimate of the environmental fate of this product under the defined conditions of the models. If released into the environment this material is expected to distribute to the air, water and soil/sediment in the approximate respective percentages;

The portion in water is expected to be soluble or dispersible.

**BIOACCUMULATION POTENTIAL** This preparation or material is not expected to bioaccumulate.

**ENVIRONMENTAL HAZARD AND** Based on our hazard characterization, the potential environmental hazard is: Low

**EXPOSURE CHARACTERIZATION** Based on our recommended product application and the product's characteristics, the potential environmental exposure is: High

If released into the environment, see CERCLA/SUPERFUND in Section 15.
