Biological Drain and Pipe Cleaner:

Product Description:-

Rxsol Zyme DPC is a concentrated biologically active powder formulation containing a blend of patented bacterial strains, specifically developed to deal with sewage wastes. It is packed as water soluble sachets (Solupac).

How it Works:

Rxsol Zyme DPC is formulated to degrade excess residual organic waste products causing blockage, or slow draining in sinks, showers, scuppers, drains, etc. The specialized bacterial strains and enzymes in Rxsol Zyme DPC will digest grease, fats, starch and other organic compounds. The bacteria in Rxsol Zyme DPC will colonise the waste soil, which lines the pipe work system, and degrade the waste all the way down to carbon dioxide and water, until the system is clean. On draining to the holding tank or sewage treatment plant, Rxsol Zyme DPC will greatly enhance the biological activity breaking down solids and removing obnoxious odors which can vent back through the systems.

Directions of Use and Dosage Rates:

Pipe Cleaning:

Maintenance dosing will keep sinks, scuppers and waste food disposal units clean, clear and odor free. A liquid solution should be prepared by adding one solupac to 10 liters of hand hot (35°C) fresh water and left for 15 minutes (stirring periodically) for the bacteria to activate.

Initial doses of 0.5 liters of this solution should be applied into sinks, scuppers, drains, waste food disposal units, etc. A maintenance dose once or twice a week can then be applied to keep the pipes in clean condition. Harsh toxic cleaners (acids, caustics, disinfectants) should not be used as these will kill off the bacterial action in the pipes. Before plumbing work for pipe modification or retrofits, pipes can be cleaned by isolating the system and filling pipes with the solution for up to 48 hours before draining. If necessary, further applications should be made until drains run clean.

Holding Tanks:

Organic wastes can be kept liquid and pump able. Tanks can be cleaned without manual entry and without the use of harsh toxic cleaning chemicals. Prepare a solution of one solupac to ten liters of hand hot (35°C) fresh water and left for 15 minutes (stirring periodically) before dosing into the holding tank once or twice a week. The dose rates should be approximately one solupac per 1000 liter waste in the tank. Tank cleaning should be carried out using Rxsol Zyme 700FN.

Note:

APPEARANCE.	Tan,saw dust like powder in sealed solupacs.
pH, in conc.	N/A.
COMPATIBILITY.	
Metal.	No known effect.
Rubber.	No known effect.
Synthetic.	No known effect.

Features, Benefits and Applications:

- Powder biological formulation for easy use.
- Biodegradable.
- Clears pipes and systems blocked by organic waste residuals.
- Eliminates obnoxious odors from soiled pipe lines.
- Cleans fouled pipes and systems, particularly long horizontal runs.
- Keeps holding tank organic waste liquid pump able and odor free.
- Cost effective, saves the time, money and manpower of plumbing operations to clear blocked pipe work.
- Overcomes potential safety problems associated with the use of toxic cleaning chemicals.

PRIVATE LABELING Services offer you the opportunity of having our high quality, manufactured products branded as your own. All RX-SOL products can be re-branded with your company name, logo, contact details, and more included on each consignment and, if required delivered direct to a site of your choice with your own delivery paper work. Private labeling is a great way to build brand loyalty with

Your customers. RX MARINE offers full-color private labeling on a wide variety of products to all our customers... and with no minimum quantity. Whether you need 1 or 100, we will place your company name, logo and contact information on the finished product. We offer several styles and sizes of labels and packaging. From standard labels with one color to glossy, waterproof labels with full-color printing. We will work with you in choosing the proper label depending on the product and your specific needs.
